WOOLWORTHS HOLDINGS LIMITED

PRELIMINARY AUDITED GROUP RESULTS FOR THE 52 WEEKS ENDED 24 JUNE 2018 AND CASH DIVIDEND DECLARATION

COMMENTARY

2018 has been a difficult year. Significant costs and disruption from transformation initiatives in David Jones and poor performance in our fashion business in South Africa have led to a result for the Group that is disappointing. This was exacerbated by challenging economic and trading conditions in both markets.

A reassessment of the carrying value of the David Jones assets resulted in the recognition of an impairment charge of A\$712.5 million (R6 927 million) processed in the first half of the financial year.

Group sales for the 52 weeks ended 24 June 2018 increased by 1.6% compared to the prior year (and by 2.9% in constant currency).

Woolworths Fashion, Beauty and Home

Sales declined by 1.5% for the year and comparable store sales were 4.1% lower. Price movement was 0.8%. Our womenswear modern range failed to resonate with our core customer. Gross profit margin was impacted by higher markdowns and promotional activity, and declined by 1.2% to 46.7%.

Costs were well controlled, with comparable store costs of 2.7% and total store cost growth of 6.4%, with 2.5% new space added. Other operating costs were flat on the prior year. Despite good cost control, operating profit declined by 21.3%, to R1706 million.

Woolworths Food

Our Food business continued to outperform the market, with sales growth of 8.4% and comparable store sales growth of 4.8% on price movement of 3.2%.

Store costs increased by 9.5%, with comparable store cost growth of 5.0%. Net new space grew by 3.5%. Other operating costs were 2.1% up on last year. Operating profit increased by 9.6% to R2 167 million.

Woolworths Financial Services

Woolworths Financial Services also had a good year, with the average debtors book growing by 4.6%. The impairment rate for the 12 months ended 30 June 2018 reduced by 1.1% to 5.2%, and operating profit grew by 11.9%.

David Jones

The business experienced significant change during the year, including the implementation of new merchandise and finance systems, the re-platforming of its online systems, the launch of the new food initiative, and the move of its head office from Sydney to Melbourne. After a difficult first half, sales increased by 2.2% and by 2.7% in comparable stores in the second half. Full year sales were 0.9% lower (and 0.4% lower in comparable stores).

Expenses increased by 8.8% as a result of the investment in food and other strategic initiatives. Comparable store costs were well controlled at 1.5%, but operating profit declined by 49.6% to A\$64 million.

Net retail space grew by 0.1%, with 4.2% new space offset by 4.1% of space reductions and closures. The sales disruption from the refurbishment of the Elizabeth Street store in Sydney will continue for approximately another 18 months.

Country Road Group (CRG)

Country Road Group had a mixed year. Strong performances from Witchery, Mimco and Politix were offset by a weaker Country Road womenswear performance, resulting in comparable store sales, which exclude Politix (acquired in November 2016), declining by 1.8%. Including Politix, sales increased by 1.7% for the year. Net retail space grew by 2.5%.

Gross profit margin improved by 2.5% to 62.8% from higher full-priced sales and reduced promotions.

Store and operating costs increased by 6.1%, mainly as a result of Politix, with comparable store costs increasing by 1.9%. Operating profit increased by 5.1% to A\$103 million.

Group earnings

Headline earnings per share (HEPS) and adjusted diluted HEPS, both of which exclude the A\$712.5 million impairment of David Jones assets recognised in the first half of the year, decreased by 17.7% and 12.8% respectively. Earnings per share, which includes the impairment, decreased by 165.2%.

Outlook

In South Africa, the change in political leadership has yet to translate into economic growth. Despite the initial improved consumer confidence experienced in the second half of the year, discretionary spending continued to be under pressure from unemployment and higher costs of living.

In Woolworths Fashion, Beauty and Home, we have made a number of changes to structure, process and product offering to effect improvement in our womenswear ranges.

In David Jones, the head office move to Melbourne is complete, as are the significant systems implementations that began last year. We now look forward to optimising those systems, focusing on trading the business and improving the customer experience. We have now also reduced our cost base by A\$25 million across Australia, largely through a restructure that took place in June.

Trading for the first seven weeks of the new financial year has shown positive signs. In Australia, David Jones and CRG sales are 3.7% and 2.1% up on last year respectively, while in South Africa, Food sales are up 7.6%. Sales in Woolworths Fashion, Beauty and Home are down 1.7%, but mainly due to a relatively smaller winter sale.

Any reference to future financial performance included in this statement has not been reviewed and reported on by the Group's external auditors, and does not constitute an earnings forecast.

Comparative information has been restated for the change in classification of trunking revenue within the Woolworths Logistics segment, as it was
established that grass rebates received from suppliers should have been presented as part of Cost of sales and not Turnover. Consequently, R221 milian
previously reported under Turnover and concession sales has been reclassified to Cost of sales. The reclassification has had no impact on the prior year
statement of financial position, statement of changes in equity, statement of cash flows, nor on earnings per share and other share measures.

NOTES

1. STATEMENT OF COMPLIANCE AND BASIS OF PREPARATION

The preliminary Group Annual Financial Statements have been prepared in accordance with the framework concepts and the measurement and recognition requirements of International Financial Reporting Standards (IFRS) and interpretations adopted by the International Accounting Standards Board (IASB), IAS 34: Interim Financial Reporting, the South African Institute of Chartered Accountants (SAICA) Financial Reporting Guides as issued by the Accounting Practices Committee, Financial Pronouncements as issued by the Financial Reporting Standards Council (FRSC), the requirements of the Companies Act of South Africa and the JSE Limited Listings Requirements.

Accounting policies applied in the preparation of these preliminary Group Annual Financial Statements are consistent with those applied in the preparation of the Group Annual Financial Statements for the 52-week period ended 24 June 2018, and are consistent with the prior year. The preliminary Group Annual Financial Statements have been prepared on the going concern and historical cost bases, except where otherwise indicated. The presentation and functional currency is the South African rand, rounded to the nearest million, except where otherwise indicated.

The preliminary Group Annual Financial Statements have been prepared under the supervision of the Group Finance Director, Reeza Isaacs CA(SA), and are the full responsibility of the directors.

2. EARNINGS PER SHARE

The difference between earnings per share and diluted earnings per share is due to the impact of unexercised options under the Group's share incentive schemes (refer to note 5).

3. PROPERTY, PLANT AND EQUIPMENT AND INTANGIBLE ASSETS

The Group acquired property, plant and equipment at a fair value of R2 097 million (2017: R1 962 million) and intangible assets at a fair value of R564 million (2017: R1 382 million).

As a result of the cyclical downturn and structural changes that have impacted performance across the Australian retail sector, and the impact of poor or delayed execution in certain key initiatives within David Jones, the carrying value of property, plant and equipment and intangible assets within David Jones was reassessed during the year. Consequently, an impairment charge of R6 927 million (A\$712.5 million) relating to goodwill and other assets was recognised.

4. PROFIT BEFORE TAX

During the period, the Group received government grants from the State of Victoria, Australia, in respect of operating expenses and capital expenditure, on the establishment of an Australian regional head office for the Group's subsidiaries, David Jones and Country Road Group. Included in profit before tax are grants received in respect of income, which have been deducted from the related expenses in terms of IAS 20: Government Grants. Grants received in respect of capital expenditure have been recognised in profit before tax on a systematic basis over the useful life of the assets. There are no unfulfilled conditions and contingencies attached to the grants recognised in the current period.

5. ISSUE AND PURCHASE OF SHARES

2 300 294 (2017: 489 382) ordinary shares totalling R137 million (2017: R39 million) were purchased from the market by Woolworths Proprietary Limited for the purposes of share incentive schemes and are held as treasury shares by the Group. 266 700 (2017: 27 186) ordinary shares totalling R15 million (2017: R2 million) were sold to the market in terms of the Group's Restricted Share Plan. 444 714 (2017: 250 042) ordinary shares totalling R15 million (2017: R18 million) were purchased and allocated to employees in terms of the Group's Restricted Share Plan.

465 934 (2017: 1820 950) ordinary shares totalling R24 million (2017: R138 million) were issued and allocated to employees in terms of the Group's other share incentive schemes.

6. ACCOUNTING POLICIES

The adoption of certain new standards, which became effective in the current year, has resulted in minor changes to accounting policies and disclosure, none of which have a material impact on the financial position or performance of the Group.

STANDARDS ISSUED, NOT YET EFFECTIVE

The Group has undertaken initial assessments of the financial impact of IFRS 9: Financial Instruments, IFRS 15: Revenue from Contracts with Customers and IFRS 16: Leases, and have identified the following, which will impact on the Group's financial results in the periods that these standards are adopted:

IFRS 9: The standard is effective for financial periods beginning on or after 1 January 2018. The measurement of provisions against receivables will be revised to comply with the expected credit loss method. Accordingly, a reduction of between 13% and 17% of the carrying value of the Group's investment in the joint venture with ABSA limited, Woolworths Financial Services, is expected. Excluding this, the Group does not consider the potential impact of application of the standard to be material.

IFRS 15: The standard is effective for financial periods beginning on or after 1 January 2018. The Group recognises revenue from the principal activities of retailing and associated activities, such as logistics services and concession sales commission.

Management has assessed the effects of applying the new standard on the Group's financial statements and has identified the following areas that are likely to be affected:

- Rights of return: IFRS 15 requires separate presentation on the statement of financial position of the right to recover the goods from the customer and the refund obligation. The requirements of IFRS 15 are not expected to result in a change in the provisioning for refunds, nor is the right of return asset expected to exceed 0.2% of sales, and is therefore not considered material;
- Gift card breakage: IFRS 15 requires the Group to estimate the value of gift cards that would expire and recognise
 this amount as revenue. The Group currently does not recognise revenue for future gift card breakage. The value of
 expected gift card breakage is not expected to exceed 0.1% of sales, and is therefore not considered material;
- Customer loyalty programmes: The standard specifies that, when the Group grants a customer the option to acquire
 additional goods or services in terms of customer loyalty programmes, and that option is a separate performance
 obligation, the Group should defer the recognition of revenue relating to the option until the performance obligations
 are fulfilled. Management has estimated that the impact on revenue is not expected to exceed 0.1% of sales, and is
 therefore not considered material.

Excluding these areas, the Group does not consider other potential impacts of application of the standard to be material.

IFRS 16: The standard is effective for financial periods beginning on or after 1 January 2019. The standard is expected to have a material impact due to the significant number of leases, and will result in changes to the statement of financial position, whereby a right-of-use asset and lease liability will be recognised. Changes to the statement of comprehensive income will result in the current operating lease costs being replaced by an amortisation of the right-of-use asset and associated finance costs. The standard will also impact a number of statutory measures such as operating profit and cash generated from operations, and will require normalisation of performance measures and covenants. The Group continues to assets the impact on its Annual Financial Statements in respect of the application of IFRS 16, including understanding the practical application of the principles of the standard. It is therefore not practical to provide a reasonable estimate of the financial effect until this review is complete.

7. FAIR VALUE OF FINANCIAL INSTRUMENTS

The carrying value of trade and other receivables, trade and other payables and borrowings approximate their fair values. In terms of IRS 13: Fair Value Measurement, the Group's borrowings are measured at amortised cost and its derivative financial instruments at fair value. These are determined to be level 2 under the fair value hierarchy. Derivatives are valued using valuation techniques with market observable inputs, with derivatives being mainly in respect of interest rate swaps and foreign exchange forward contracts. The most frequently applied valuation technique include forward pricing and swap models, using present value calculations. The models incorporate various inputs, including the credit quality of counterparties, foreign exchange spot and forward rates, interest rate curves and forward rate curves of the underlying index.

8. CONTINGENT LIABILITIES

Group companies are party to legal disputes and investigations that have arisen in the ordinary course of business. Whilst the outcome of these matters cannot readily be foreseen, the directors do not expect them to have any material financial effect.
