COMMENTARY ON PERFORMANCE

The Group's turnover and concession sales for the 26 weeks ended 25 December 2022 ("current period" or "period") increased by 18.5% compared to the 26 weeks ended 26 December 2021 ("prior period" or "last year") and by 16.3% in constant currency terms. Trade during this period is not directly comparable to that of last year due to the impact of government-imposed lockdowns in Australia in the prior period base. Group turnover and concession sales increased by 8.8% during the last six weeks of the half, which is directly comparable to that of the prior period, underpinned by strong Black Friday and festive season trade.

The return of customers to physical stores, particularly in Australia, resulted in a substantial increase in brick-and-mortar sales, with the contribution of online sales moderating to 10.9% of total turnover and concession sales, compared to 13.7% for the prior period.

Earnings per share ("EPS") grew by 74.9% to 293.7cps, compared to 167.9cps for the prior period, while headline EPS ("HEPS") and adjusted diluted HEPS increased by 75.1% and 75.5% over the prior period to 294.5cps and 284.7cps, respectively.

The Group ended the half with a very healthy balance sheet and a net cash position in Australia of A\$351.4 million. Continued focus on working capital management and capex prioritisation resulted in cash conversion exceeding 90%, generating Free Cash Flow of 269.0cps. In line with the Group's refreshed capital allocation framework, we have also repurchased shares to a value of a further R1.5 billion during the current period, bringing the total buyback over the past year to 4.3% of issued shares. The share repurchases positively impact EPS, HEPS, adHEPS and other capital return metrics in the current and future periods.

DISPOSAL OF DAVID JONES

As announced on the JSE Stock Exchange News Service ("SENS") on 19 December 2022, the Group has entered into an agreement to sell its entire shareholding in its Australian subsidiary, David Jones. As part of the transaction, WHL will retain the flagship property asset in Bourke Street, Melbourne, which will be leased back to David Jones on market-related terms. The agreement is subject to terms and conditions customary for transactions of this nature, and WHL anticipates the transaction to complete by the end of March 2023, with the final proceeds to be determined based on completion accounts. Management expects to realise value in excess of the carrying value of the David Jones assets. Over the past year, we have also returned R1.6 billion of capital from David Jones to WHL.

The transaction will materially improve the return on capital of the Group by further transforming its balance sheet through the removal of c.R22 billion in liabilities (including c.R17 billion in liabilities earling to the David Jones store portfolio). Importantly, this also enables the reallocation of capital and management focus towards the Group's core, and higher yielding South African businesses and the Australian Country Road Group.

SOUTHERN AFRICA

IMPACT OF LOADSHEDDING

South Africa is facing a devastating energy crisis, which continues to have a pronounced impact our economy, as well as business and consumer confidence. We estimate the financial impact of loadshedding to have reduced our Southern Africa adjusted operating profit by c.RIS million per month (c.R90 million in total over the halfl), with the majority of this incurred in our predominantly fresh Food business, as a result of increased waste and diesel costs in both our supply chain and stores. Given the erratic and unpredictable nature of loadshedding, we are focused on developing a longer-term business solution to sustainably mitigate both upstream and downstream impacts to this challenge. This includes the impacts on our suppliers, and particularly those where the costs required to manage the breakdown in infrastructure have become prohibitive.

Whilst we are focused on minimising both the operational and financial impacts of loadshedding, our primary objective is to protect the quality and integrity of our superior cold chain, and the trust our customers place in our brand. We have made significant past investments in our energy supply capabilities, with 99% of our stores and all our distribution centres already equipped with generator capacity. Furthermore, the majority of our suppliers are exclusive to our Food business, with these partnerships, in many instances, spanning decades. This places us in a favourable position to build a holistic, integrated and fully resilient response plan from here.

WOOLWORTHS FASHION, BEAUTY AND HOME ('FBH')

The Fashion Beauty Home turnaround strategy continues to gain traction. Turnover and concession sales grew by 11.2%, and by 11.0% on a comparable store basis, and strengthened to 12.0% in the last six weeks of the period. Price movement of 10.8% remained positively impacted by the ongoing focus on full-price sales and the continued reduction in markdowns. Tracling space was further reduced by 2.2% over the prior period. Online sales grew by 4.5% and contributed 4.2% of South African sales.

A deliberate focus on full-price sales, and a smaller but more profitable winter clearance, resulted in gross profit margin increasing by 170bps to 48.0%, notwithstanding inflationary supply chain pressures. Expense growth was 10.0%, with store cost growth contained to 6.5%, as we continued to reduce unproductive space. Adjusted operating profit increased by 25.5% to R979 million, resulting in an operating margin of 13.1% for the current period, compared to 11.6% in the prior period. Excluding the impact of loadshedding, adjusted operating profit growth on the prior period was 290bps higher, at 28.4%, with operating margin 30bps higher, at 13.4%.

WOOLWORTHS FOOD

The Food business grew turnover and concession sales by 7.6% and by 5.4% on a comparable store basis, with sales growth accelerating to 8.6% in the last six weeks of the period. This is notwithstanding the considerable disruption caused by loadshedding, which continues to have a pronounced impact in terms of foregone sales and increased costs. Price movement increased to 6.8% for the period, being below underlying product inflation of 8.4%, due to continued price investment, as we further enhance our overall customer value proposition. Space grew by 2.5% relative to the prior period. Online sales increased by 22.7%, now accounting for 3.6% of South African sales, as we continue to expand our on-demand offering, Woolies Dash.

Gross profit margin decreased by 30bps to 23.8%, due to the impact of loadshedding on waste and supply chain costs, the continued shift to online, and the ongoing investment in price. Additional diesel costs, coupled with higher cost inflation, resulted in expense growth of 8.5% on last year. Adjusted operating profit grew by 0.2% to R1 412 million, returning an operating profit margin of 6.7% for the current period, compared to 7.2% in the prior period. Excluding the impact of loadshedding, adjusted operating profit growth on the prior period was 490bps higher, at 5.1%, with operating margin 30bps higher, at 7.0%.

WOOLWORTHS FINANCIAL SERVICES ('WFS')

The WFS book reflects a year-on-year increase of 17.2% to the end of December 2022, driven by consumer spending, as well as new accounts and credit card advances. The annualised impairment rate for the six months ended 31 December 2022 was 5.5%, compared to 4.0% in the prior period, due to the growth in new business.

AUSTRALIA AND NEW ZEALAND ('ANZ')

Our businesses in ANZ continued their positive momentum, notwithstanding the increased inflationary pressures faced by consumers during the period.

COUNTRY ROAD GROUP ('CRG')

Country Road Group sales grew by 25.5% and by 26.6% in comparable stores, underpinned by strong performances from the Country Road, Politix and Witchery brands in particular. The last six weeks of trade, which are comparable to that of the prior period, saw Country Road Group delivering strong sales growth of 8.5%. Space reduced by 5.5% during the period. Online sales contributed 26.1% to total sales, compared to 33.8% for the prior period.

Strong full price sales and reduced promotional activity drove an increase in gross profit margin of 400bps to 63.5%, notwithstanding higher supply chain costs. Expenses increased by 22.0% on the lockdown-impacted prior period base. Adjusted operating profit increased by 94.2% to A\$93.2 million, returning an operating profit margin of 15.0%, compared to 9.7% in the prior period.

DAVID JONES ('DJ')

The successful turnaround of David Jones has delivered a notable improvement in the business' underlying operational and financial health. For the period, turnover and concession sales increased by 31.8% and by 27.6% on a comparable store basis, with our flagship and CBD stores performing ahead of expectations. Sales in the last six weeks grew by 2.3%. Trading space reduced by 3.6% relative to the prior period. Online sales contributed 17.2% of total sales, compared to 28.1% for the prior period.

Gross profit margin improved by 140bps to 36.4%. Expenses increased by 15.5%, on the lockdown-impacted prior period base, offset by savings arising from the successful execution of cost-saving initiatives. Adjusted operating profit grew by 245.8% to A\$106.5 million, returning an operating profit margin of 8.3%, compared to 3.2% in the prior period.

David Jones is reported as a discontinued operation in the Group's interim results following the agreement to sell its entire shareholding in the subsidiary, as announced on SENS on 19 December 2022.

WHL 4 / 2023 WHL 5 / 2023

OUTLOOK

The trading environment over the second half of the financial year is expected to prove more challenging as we continue to face numerous headwinds through higher inflation and interest rates, which are placing pressure on both consumer demand and costs, In South Africa. an imminent resolution to the debilitating power crisis and stimulus for economic growth appears remote. These factors, coupled with a higher comparative base effect, are likely to result in slower profit growth (from continued operations) in the current half, relative to the first half.

Looking beyond the 2023 financial year, we remain confident in our self-driven opportunities, and the traction we are seeing in the execution of our strategies. With a much strengthened and simplified WHL Group post the David Jones disposal, we are well positioned to invest even areater management time and financial resources in our remaining businesses, to the benefit of all stakeholders.

NOTES TO THE CONDENSED CONSOLIDATED INTERIM RESULTS

1. STATEMENT OF COMPLIANCE AND BASIS OF PREPARATION

The condensed consolidated interim financial statements are prepared in accordance with the requirements of the JSE Limited Listings Requirements and Debt Listings Requirements for interim reports, and the requirements of the Companies Act of South Africa applicable to interim financial statements. The JSE Limited Listings Requirements and Debt Listings Requirements require interim reports to be prepared in accordance with and containing the information required by IAS 34 Interim Financial Reporting, as well as the framework concepts and the measurement and recognition requirements of International Financial Reporting Standards (IFRS) and the SAICA Financial Reporting Guides, as issued by the Accounting Practices Committee and Financial Pronouncements, as issued by Financial Reporting Standards Council. WHL listed its ordinary shares on a secondary exchange, A2X, with effect from 2 December 2022.

The accounting policies applied in the preparation of the condensed consolidated interim financial statements are in terms of International Financial Reporting Standards and are consistent with those applied in the preparation of the Group Annual Financial Statements for the 52-week period to 26 June 2022 and with the prior period, except for the change in accounting policies adopted, as detailed in note 8. The condensed consolidated interim financial statements have been prepared on the going concern and historical cost bases, except where otherwise indicated. The presentation currency is the South African rand, rounded to the negrest million, except where otherwise indicated.

The condensed consolidated interim financial statements have been prepared under the supervision of the Group Finance Director, Reeza Isaacs CA(SA), and are the full responsibility of the directors.

Refer to the Commentary for details on the Group's performance.

4. HEADLINE EARNINGS

	Unaudited 26 weeks to 25 Dec 2022 Rm	Unaudited 26 weeks to 26 Dec 2021 Rm	% change	Audited 52 weeks to 26 Jun 2022 Rm

5. NON-IFRS MEASURES: ADJUSTED HEADLINE EARNINGS

Adjusted headline earnings is calculated by excluding items from headline earnings that have attributes of either being of a non-recurring nature, volatile, having a material impact on earnings or not incurred in the ordinary course of business, which would otherwise have not been considered under IAS 33: Earnings per share or the SAICA guideline on headline earnings. Management believes that the use of an adjusted headline earnings measure is helpful to users of financial statements and investors by providing a more meaningful measure of sustainable earnings or the quality of earnings and thereby improve performance comparisons between different reporting periods. The methodology of determining adjustments is applied consistently over the different reporting periods. Adjusted headline earnings is also one of the performance conditions applicable to the Group's share incentive schemes.

The scheme allocation, as well as the maximum award to any one participant specified in the trust deed, have also been adjusted accordingly.

8. CHANGE IN ACCOUNTING POLICIES

The adoption of certain new standards, which became effective in the current period, has resulted in minor changes to accounting policies and disclosure, none of which have a material impact on the financial position or performance of the Group.

PROPERTY, PLANT AND EQUIPMENT: PROCEEDS BEFORE INTENDED USE - AMENDMENTS TO IAS 16

The amendment prohibits an entity from deducting from the cost of an item of property, plant and equipment any proceeds received from selling items produced while the entity is preparing the asset for its intended use. It also clarifies that an entity is 'testing whether the asset is functioning properly' when it assesses the technical and physical performance of the asset.

REFERENCE TO THE CONCEPTUAL FRAMEWORK - AMENDMENTS TO IFRS 3

Minor amendments were made to IFRS 3 Business Combinations to update the references to the Conceptual Framework for Financial Reporting. The amendments also confirm that contingent assets should not be recognised at the acquisition date.

ONEROUS CONTRACTS: COST OF FULFILLING A CONTRACT - AMENDMENTS TO IAS 37

The amendment clarifies that the direct costs of fulfilling a contract include both the incremental costs of fulfilling the contract and an allocation of other costs directly related to fulfilling contracts. Before recognising a separate provision for an onerous contract, the entity recognises any impairment loss that has occurred on assets used in fulfilling the contract.
