GROUP

The Group's results for the first half of the 2026 financial year ("period") reflect the ongoing progress in our various strategic initiatives, with improving performance in our apparel businesses and continued above-market growth in our leading Food business. This is notwithstanding a constrained trading environment across both geographies. In Southern Africa, discretionary spend remains subdued, despite the easing inflationary and interest rate environment, while Australia's prolonged discounting in a high-cost inflationary environment continues to exert pressure on retail footfall and spend. Against this backdrop, the Group delivered pleasing turnover and concession sales growth for the period of 5.4%, and 6.1% on a constant currency basis, with positive sales growth in all segments of the business.

Gross profit margins have, however, been under pressure, due to a combination of long-term capacity investment, targeted price investment, the stronger growth of lower margin channels and categories, and increased promotions to clear excess inventory. Expenses have been well controlled to ensure positive profit growth for the half. Group adjusted earnings before interest and tax ("aEBIT") increased by 2.5% on the prior period, to R2.9 billion, whilst adjusted earnings before interest and tax, depreciation and amortisation ("aEBITDA") increased by 3.2% to R4.6 billion, reflecting the impact of the investment in our various strategic and growth-enabling initiatives. Adjusted diluted headline earnings per share grew by 0.7% to 170.3cps over the prior period, while headline earnings per share was up by a pleasing 9.6% to 167.4cps. Earnings per share growth was negatively impacted by the inclusion of the profit on sale of the Bourke Street property and the rental received on the property, in the prior period.

The Group's previously communicated share buyback programme commenced in September 2025, with 6.9 million shares repurchased in the period, at a weighted average share price of R51.23.

The Group ended the period with net borrowings of R5.8 billion (versus R5.6 billion at June 2025), with the Australian subsidiaries in a net cash position of A\$159.1 million. Our focus on cash generation has resulted in cash conversion increasing to 109.8% from 77.9% in the prior period. The net debt to EBITDA ratio of 1.48 times is within our targeted gearing ratio and the Return on Capital Employed of 16.6% remains well above the cost of capital of 11.4%.

WOOLWORTHS

Woolworths South Africa delivered above-market turnover and concession sales growth of 6.8% for the period, notwithstanding relatively subdued consumer confidence and spend.

WOOLWORTHS FOOD

Our Food business continued to deliver strong turnover and concession sales growth of 7.0% and 5.2% on a comparable-store basis, with consistent month-on-month market share

gains. This was supported by positive underlying volume growth driven by the continued focus and investment in our premium food offering and overall customer experience. Sales growth moderated to 5.3% in the last seven weeks, with price movement averaging 4.6% for the half. Revenue through Woolies Dash grew by 23.0%, with the online channel now contributing 7.2% to SA Food sales. Net trading space increased by 4.3% (weighted basis: 1.8%) on the prior period.

The successful expansion of the Midrand distribution centre ("DC") is well progressed, albeit impacting the near-term gross profit margin given the increased depreciation arising from this significant investment. Notwithstanding this, and the dilutionary impact of a growing online channel, gross profit margin decreased by only 10bps to 24.8%, benefitting from improved promotional effectiveness. An increase in operating expenses from investments in growth initiatives resulted in expense growth of 7.9%. Adjusted operating profit grew by 3.5% to R1 780 million, delivering an operating profit margin of 6.5%. Pleasingly, adjusted EBITDA of R2 435 million increased by 7.0%, in line with topline growth.

WOOLWORTHS FASHION, BEAUTY AND HOME ('FBH')

FBH turnover and concession sales increased by 6.2% and by 6.4% on a comparable-store basis, supported by improved product availability as a result of our transformational value chain initiatives. This momentum was maintained over Black Friday and the festive season, with sales growth of 6.1% in the last seven weeks of the period, implying encouraging market share gains over the half and positive underlying volume growth. Our Beauty and Home businesses delivered stronger growth of 8.9% and 14.0%, respectively. The ongoing initiative to optimise space and efficiency metrics resulted in net trading space decreasing by a further 1.9% relative to the prior period, whilst online sales contributed 6.2% to SA FBH sales.

Price movement averaged 2.8% over the period. This incorporated Fashion inflation at 1.3%, resulting from our price investment in Kidswear and the clearance of excess inventory emanating from the prior period's DC transition. This impacted the gross profit margin, which declined by 50bps to 45.8%. Expenses were well controlled, with growth at 5.5%, notwithstanding the increased investments and associated costs of strategic initiatives. Adjusted operating profit increased by 1.0% to R771 million, implying an operating profit margin of 9.3% for the period. Adjusted EBITDA increased by 4.5% to R1 244 million.

WOOLWORTHS FINANCIAL SERVICES ('WFS')

The WFS book increased by 1.8% on a year-on-year basis to the end of December 2025, and increased by 2.6% when excluding the sale of part of the legal book. This was driven through disciplined focus on quality growth through both new accounts as well as credit limit increases on existing accounts. The annualised impairment rate for the six months ended 31 December 2025 was 6.4%, and remains sector leading.

COUNTRY ROAD GROUP ('CRG')

CRG sales increased by 2.3% for the period and by 2.5% on a comparable-store basis. The Country Road, Witchery and Politix brands traded ahead of the prior period, benefiting from the repositioning of the brand portfolio and the successful restructuring of CRG's operating model, which continues to be further embedded in the business. Following a strong Black Friday and Cyber Monday trading period in November, Australia's December retail trading performance proved softer than anticipated. As a result, CRG's sales growth averaged 1.0% for the last seven weeks of the period. Net trading space increased by 0.2% on the prior comparable period, with the online contribution to sales broadly unchanged at 27.2%.

Higher promotional activity and deliberate initiatives to clear excess inventory resulted in a 100bps decrease in the gross profit margin to 57.9%. Expenses were maintained in line with last year despite the higher cost-of-doing business in Australia, supported by the successful restructure of the operating model in the prior period. Adjusted operating profit of A\$14.8 million increased by 4.2%, returning an operating profit margin of 2.6%.

OUTLOOK

While the South African macroeconomic environment is showing positive early signs of recovery, inflationary pressures in Australia and the subsequent recent interest rate hike is likely to further weaken consumer confidence in the country, tempering any recovery in Australian retail spend. Further, recent geopolitical events will increase the degree of uncertainty around the broader global macro outlook.

Notwithstanding this context, we have clear and compelling strategies and strengthened foundational capabilities, which are already yielding positive outcomes. We expect this trend to continue and, as a result, remain confident in our ability to deliver an improvement in the Group's overall financial performance for the year. Furthermore, the ongoing evaluation and refinement of our capital allocation towards returns accretive investments will continue to improve our Group's overall value creation prospects and profile.

NOTES TO THE INTERIM GROUP RESULTS

1. STATEMENT OF COMPLIANCE AND BASIS OF PREPARATION

The Unaudited Condensed Interim Group Results are prepared in accordance with the requirements of the JSE Limited Listings Requirements and Debt and Specialist Securities Listings Requirements for condensed consolidated interim financial statements, and the requirements of the Companies Act of South Africa. The JSE Limited Listings Requirements and Debt and Specialist Securities Listings Requirements require condensed consolidated interim financial statements to be prepared in accordance with the framework concepts and the measurement and recognition requirements of IFRS® Accounting Standards and the SAICA Financial Reporting Guides, as issued by the Accounting Practices Committee and Financial Pronouncements, as issued by Financial Reporting Standards Council.

The accounting policies applied in the preparation of the Unaudited Condensed Interim Group Results are in terms of IFRS Accounting Standards and are consistent with those applied in the preparation of the Group Annual Financial Statements for the 52 weeks ended 29 June 2025 and with the prior period, except for the change in accounting policies adopted, as detailed in note 8. The Unaudited Condensed Interim Group Results have been prepared on the going concern and historical cost bases, except where otherwise indicated. The presentation currency is the South African rand, rounded to the nearest million, except where otherwise indicated.

The Unaudited Condensed Interim Group Results are not audited. The Unaudited Condensed Interim Group Results have been prepared under the supervision of the Group Finance Director, Zaid Manjra CA(SA), and are the full responsibility of the directors.

For details on the Group's performance, refer to the Commentary on performance.

3. EARNINGS PER SHARE

The difference between earnings per share and diluted earnings per share is due to the impact of unvested shares under the Group's share incentive schemes (refer to note 7).

4. HEADLINE EARNINGS

	Unaudited 26 weeks to 28 Dec 2025 Rm	Unaudited 26 weeks to 29 Dec 2024 Rm	% change	Audited 52 weeks to 29 Jun 2025 Rm

Headline earnings is calculated by starting with Basic earnings in terms of IAS 33 and then excluding re-measurements that have been identified in the SAICA Headline Earnings Circular 1/2023.

5. PRO FORMA MEASURES: ADJUSTED HEADLINE EARNINGS

Adjusted headline earnings is calculated by excluding items from headline earnings that have attributes of either being of a non-recurring nature, volatile, having a material impact on earnings or not incurred in the ordinary course of business (collectively described as "Non-core trading expenses"), which would otherwise have not been considered under IAS 33 or the SAICA guideline on headline earnings. The use of an adjusted headline earnings measure is helpful to users of financial statements by providing a more meaningful measure of sustainable earnings or the quality of earnings and thereby improve performance comparisons between reporting periods and is applied consistently over the reporting periods. Adjusted headline earnings is one of the performance conditions applicable to the Group's share incentive schemes.

Both non-core trading expenses and headline earnings adjustments that have the aforementioned attributes (described as "capital items") have been excluded from Operating profit from core trading activities in the Group statement of comprehensive income. The 'As reported 26 weeks to 29 Dec 2024' comparative information has been disaggregated between "Headline earnings adjustments from core trading activities" and "Non-core trading expenses and capital items". This disaggregation had no impact on Adjusted headline earnings.
